

Illicit Discharge Detection and Elimination: Outfall Reconnaissance Inventory

Presentation Overview

- Using Existing Data
- Review of ORI
- Customization and caveats of ORI
- Post-processing
- Collecting samples

Quick “Desktop Assessment”

- Existing Water Quality Monitoring is a Great Start

Some Screening Factors for Illicit Discharge Potential (IDP)

- Past Discharge Complaints
- Poor Dry Weather Water Quality
- Aging Sewers
- Any others?

Select the factors that apply most to your community

Initial Desktop Screening Helps to:

- Identify best areas to focus on for Outfall investigations.
- Determine if IDDE should be a primary focus in a particular watershed.
- Develop field maps:
 - Outfalls
 - Storm Drain System (if available)
 - Land use/land cover
 - Other?

Field Assessments

The Basics

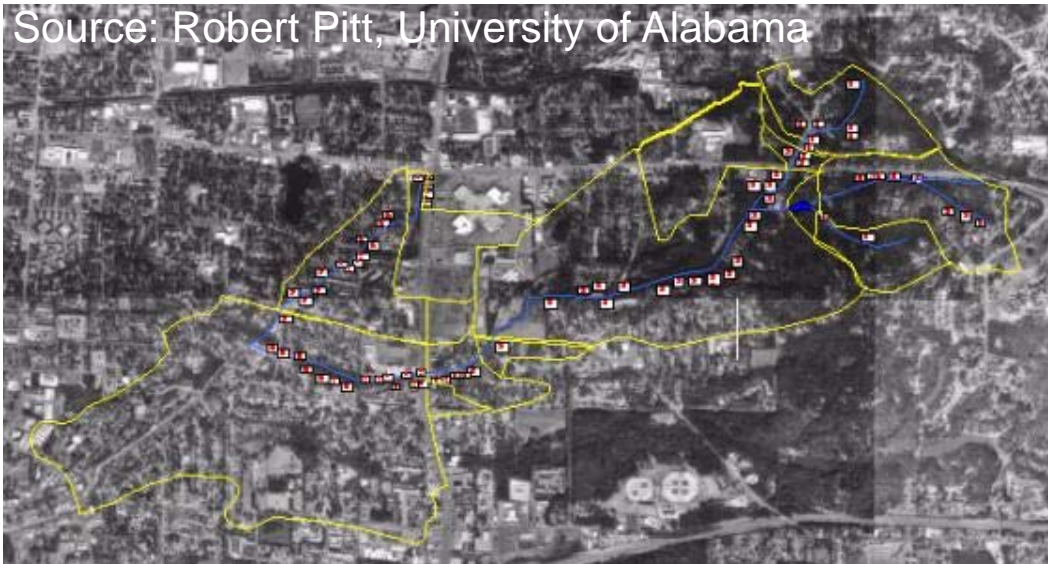

- Time of year considerations
- Supplies
- Staffing requirements
- Safety considerations

Outfall Reconnaissance Inventory (ORI) Map, Mark & Photograph Outfalls

- Assign unique ID to each outfall
- Physically mark each outfall
- Use a GPS unit to record outfall locations
- Take a photograph

Source: Robert Pitt, University of Alabama

May need to work back up
floodplain to find outfall

11.20.2002

Section 1: Background Data

Today's date: <input type="text"/>	Time (Military): <input type="text"/>	Subwatershed: <input type="text"/>	Outfall ID: <input type="text"/>
Investigators: <input type="text"/>	Form completed by: <input type="text"/>	Temperature (°F): <input type="text"/>	
Camera: <input type="text"/>	Photo #s: <input type="text"/>	Rainfall (in.): Last 24 hours: <input type="text"/>	Last 48 hours: <input type="text"/>
Latitude: <input type="text"/>	Longitude: <input type="text"/>	GPS Unit: <input type="text"/>	GPS LMK #: <input type="text"/>
Land Use in Drainage Area (Check all that apply):			
<input type="checkbox"/> Industrial <input type="checkbox"/> Ultra-Urban Residential <input type="checkbox"/> Commercial <input type="checkbox"/> Open Space <input type="checkbox"/> Suburban Residential <input type="checkbox"/> Institutional			
Other: <input type="text"/>		Known Industries: <input type="text"/>	

Outfall Reconnaissance Inventory (ORI)

Record Basic Characteristics

- Dimensions
- Material
- Whether or not outfall is flowing

Section 2: Outfall Description

LOCATION	MATERIAL	SHAPE	DIMENSIONS (IN.)	SUBMERGED
<input type="checkbox"/> Closed Pipe	<input type="checkbox"/> RCP <input type="checkbox"/> CMP <input type="checkbox"/> PVC <input type="checkbox"/> HDPE	<input type="checkbox"/> Circular <input type="checkbox"/> Single <input type="checkbox"/> Elliptical <input type="checkbox"/> Double	Diameter, circular: <input type="text"/> Box: h - <input type="text"/> w - <input type="text"/> Elliptical: h - <input type="text"/> w - <input type="text"/>	In Water: <input type="checkbox"/> No <input type="checkbox"/> Partially* <input type="checkbox"/> Fully* With Sediment: <input type="checkbox"/> No <input type="checkbox"/> Partially <input type="checkbox"/> Fully
<input type="checkbox"/> Manhole	<input type="checkbox"/> Steel <input type="checkbox"/> Other: <input type="text"/>	<input type="checkbox"/> Box <input type="checkbox"/> Triple <input type="checkbox"/> Other: <input type="text"/> <input type="checkbox"/> Other: <input type="text"/>		
<input type="checkbox"/> Open drainage	<input type="checkbox"/> Concrete <input type="checkbox"/> rip-rap <input type="checkbox"/> Earthen <input type="checkbox"/> Other: <input type="text"/>	<input type="checkbox"/> Trapezoid <input type="checkbox"/> Other: <input type="text"/> <input type="checkbox"/> Parabolic	Depth: <input type="text"/> Top Width: <input type="text"/>	Bottom Width: <input type="text"/>
<input type="checkbox"/> In-Stream	Complete Stream Discharge form			
Flow Present?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<i>If No, Skip to Section 5</i> Flow Description <input type="checkbox"/> Trickle <input type="checkbox"/> Moderate <input type="checkbox"/> Substantial		

Section 3: Quantitative Characterization

Outfall Reconnaissance Inventory (ORI)

Simple Monitoring at Flowing Outfalls

- Flow
- pH
- Temperature
- Ammonia

Section 3: Quantitative Characterization

FIELD DATA FOR FLOWING OUTFALLS				
PARAMETER		RESULT	UNIT	EQUIPMENT
<input type="checkbox"/> Flow #1	Volume		Liter	Bottle
	Time to fill		Sec	Stopwatch
<input type="checkbox"/> Flow #2	Flow width	' "	Ft, In	Tape measure
	Flow depth	1. _____ 2. _____ 3. _____	In	Tape measure
	Time of travel (thru over)	1. _____ 2. _____ 3. _____	Sec	Stop watch
	Measured length	' "	Ft, In	Tape measure
<input type="checkbox"/> Flow #3 (only for free-flowing outfalls)	Flow depth		In	Tape measure
	Wetted width		ft	Tape measure
Ammonia			mg/L	Colorimeter
Temperature			°F	--
pH				--
Potassium			Ppm	Ion probe
Detergents			Ppm	Chemets kits
Fluoride			Mg/L	Photometer
Conductivity			μS	Conductivity probe

Outfall Reconnaissance Inventory (ORI)

Physical Indicators for Flowing Outfalls

- Odor
- Color
- Turbidity
- Floatables

Section 4: Physical Indicators for Flowing Outfalls Only

Are Any Physical Indicators Present in the flow? ☐ Yes ☐ No (If No, Skip to Section 5)

INDICATOR	CHECK if Present	DESCRIPTION	RELATIVE SEVERITY INDEX (1-3)		
Odor	<input type="checkbox"/>	<input type="checkbox"/> Sewage <input type="checkbox"/> Rancid/sour <input type="checkbox"/> Petroleum/gas <input type="checkbox"/> Sulfide <input type="checkbox"/> Other: <input type="text"/>	<input type="checkbox"/> 1 – Faint	<input type="checkbox"/> 2 – Easily detected	<input type="checkbox"/> 3 – Noticeable from a distance
Color	<input type="checkbox"/>	<input type="checkbox"/> Clear <input type="checkbox"/> Brown <input type="checkbox"/> Gray <input type="checkbox"/> Yellow <input type="checkbox"/> Green <input type="checkbox"/> Orange <input type="checkbox"/> Red <input type="checkbox"/> Other: <input type="text"/>	<input type="checkbox"/> 1 – Faint colors in sample bottle	<input type="checkbox"/> 2 – Clearly visible in sample bottle	<input type="checkbox"/> 3 – Clearly visible in outfall flow
Turbidity	<input type="checkbox"/>	See severity	<input type="checkbox"/> 1 – Slight cloudiness	<input type="checkbox"/> 2 – Cloudy	<input type="checkbox"/> 3 – Opaque
Floatables -Does Not Include Trash!!	<input type="checkbox"/>	<input type="checkbox"/> Sewage (Toilet Paper, etc.) <input type="checkbox"/> Suds <input type="checkbox"/> Petroleum (oil sheen) <input type="checkbox"/> Other: <input type="text"/>	<input type="checkbox"/> 1 – Few/slight; origin not obvious	<input type="checkbox"/> 2 – Some; indications of origin (e.g., possible suds or oil sheen)	<input type="checkbox"/> 3 – Some; origin clear (e.g., obvious oil sheen, suds, or floating sanitary materials)

Outfall Reconnaissance Inventory (ORI)

What to do when obvious illicit discharge encountered?

- STOP the ORI
- Track the source
- Contact appropriate water pollution agency
- Photo document, estimate flow, and collect a sample – if safe

Photo Source: R. Frymire

Outfall Reconnaissance Inventory (ORI)

Physical Indicators for Flowing and Non-Flowing Outfalls

- Outfall Damage
- Deposits/Stains
- Abnormal Vegetation
- Poor Pool Quality
- Pipe Benthic Growth

Section 5: Physical Indicators for Both Flowing and Non-Flowing Outfalls

Are physical indicators that are not related to flow present? ☐ Yes ☐ No (If No, Skip to Section 6)

INDICATOR	CHECK if Present	DESCRIPTION	COMMENTS
Outfall Damage	<input type="checkbox"/>	<input type="checkbox"/> Spalling, Cracking or Chipping <input type="checkbox"/> Peeling Paint <input type="checkbox"/> Corrosion	<input type="checkbox"/>
Deposits/Stains	<input type="checkbox"/>	<input type="checkbox"/> Oily <input type="checkbox"/> Flow Line <input type="checkbox"/> Paint <input type="checkbox"/> Other: <input type="checkbox"/>	<input type="checkbox"/>
Abnormal Vegetation	<input type="checkbox"/>	<input type="checkbox"/> Excessive <input type="checkbox"/> Inhibited	<input type="checkbox"/>
Poor pool quality	<input type="checkbox"/>	<input type="checkbox"/> Odors <input type="checkbox"/> Colors <input type="checkbox"/> Floatables <input type="checkbox"/> Oil Sheen <input type="checkbox"/> Suds <input type="checkbox"/> Excessive Algae <input type="checkbox"/> Other: <input type="checkbox"/>	<input type="checkbox"/>
Pipe benthic growth	<input type="checkbox"/>	<input type="checkbox"/> Brown <input type="checkbox"/> Orange <input type="checkbox"/> Green <input type="checkbox"/> Other: <input type="checkbox"/>	<input type="checkbox"/>

Outfall Reconnaissance Inventory (ORI)

Section 6-8

Section 6: Overall Outfall Characterization

☐ Unlikely ☐ Potential (presence of two or more indicators) ☐ Suspect (one or more indicators with a severity of 3) ☐ Obvious

Section 7: Data Collection

1. External lab sample (50 ml, plastic)?	<input type="checkbox"/> Yes	<input type="checkbox"/> No	2. Internal lab sample (~50 ml, <u>whirlpack</u>)?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
3. Sterile sample for bacteria analysis (100 ml, <u>whirlpack</u>)?	<input type="checkbox"/> Yes	<input type="checkbox"/> No			
4. Sample(s) collected from:	<input type="checkbox"/> Flow	<input type="checkbox"/> Pool	5. Duplicate collected?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
			If yes, check appropriate: <input type="checkbox"/> External lab <input type="checkbox"/> Internal lab <input type="checkbox"/> Sterile		

Section 8: Any Non-Illicit Discharge Concerns (e.g., trash or needed infrastructure repairs) or other Notes?

- Illicit Discharge Severity?
- Sample taken at outfall?
- Note unusual conditions near the outfall

Quick and Dirty ORI Exercise

(Pardon the pun!)

Source: R. Frymire

Source: Fort Worth DEM

Customizing the ORI

- Open channels
- Submerged or tidally influenced outfalls
- Cold climate/ ice
- Other local indicators (e.g., biological)

The ORI Cannot:

- Find all discharges (can sometimes lead to a “false positive” as well)
- Detect intermittent flows that leave no trace
- Quantify impacts definitively (no direct measure of relative problem)
- Define sources (except for some obvious indicators)

Post-Screening Prioritization

ORI, combined with other existing data, can help determine:

- Extent of the problem
- If problems are “clustered”
- Indicators of intermittent discharges
- Relative ranking of problem outfalls

Subwatershed and Survey Reach Screening: Metrics to Consider

- Fraction flowing (from ORI)
- Number with physical indicators, and severity
- Indicators at dry outfalls
- Other existing monitoring data
- In-stream goals
- History of complaints

Characterizing the IDDE Problem at the Watershed Level:

Using Stream and ORI Data to Categorize IDDE Problems	
Extent	ORI Support Data
Minimal	<ul style="list-style-type: none">• Less than 10% of total outfalls are flowing• Less than 20% of total outfalls with obvious, suspect or potential designation
Clustered	<ul style="list-style-type: none">• Two thirds of the flowing outfalls are located within one third of the subwatersheds• More than 20% of the communities subwatersheds have greater than 20% of outfalls with obvious, suspect or potential designation
Severe	<ul style="list-style-type: none">• More than 10% of total outfalls are flowing• More than 50% of total outfalls with obvious, suspect or potential designation• More than 20% of total outfalls with obvious or suspect designation

Summary
